

Clarion Medical Technologies (formerly Coherent-AMT) is committed to building customer relationships for life by delivering innovative medical solutions that improve the lives of our customers and their patients. We are currently looking for a **Business Analyst** to collaborate with all levels of business to continually improve knowledge and data management through implementation of key business reports and managing projects. Your understanding of business goals, objectives, processes and requirements allows you to collaborate and consult with team members at all levels of the organization to implement high quality reports and meet project deliverables. You will leverage your experience to improve the capabilities of team members in the area of process, cross functional dependencies, data management and knowledge sharing. Working directly with managers, you will participate in performance management of team members.

Responsibilities:

- Leading and managing departmental and cross functional initiatives
- Analysis and presentation of strategic business reporting
- Prepare and present Business Cases
- Management of key business reporting and key business projects from concept through implementation and continual improvement or handoff
- Translating user requirements into technical documentation for IT and other technical resources including testing and training
- New product launches and promotions including product phase out
- Assist department managers in developing effective reports
- Conduct sessions with Team Members and Managers to drive overall improvement in performance of all team members
- Identify inconsistencies and gaps within business and/or transactional processes and implement required improvements
- Lead and manage Business Projects
- Develop and improve tools to manage priorities, timelines and costs

Key Competencies and Skills:

- Requirements gathering, data modeling, process modeling, business work-flow, and user-centered design within the context of organizational standards
- Business Tools: ERP, Microsoft Office, Sharepoint, Web, DataMining , Process Mapping, Report writing, Business Case Templates, SQL
- People oriented
- Fast thinker
- Flexible attitude
- Solid writing and documentation
- Solid problem solving and analytical skills
- Team facilitation and negotiation skills

Qualifications:

- University degree
- 3-5 years of progressive business analysis experience, supporting key business projects
- 3-5 years experience engaging stakeholders in meetings and workgroups
- Experience working with Sr. Executives, Sales, Marketing, Finance, Purchasing, Warehousing, Order Fulfillment, HR and IT
- Data validation, testing, verification, systems development experience
- Software implementation/project participation
- Previous presentation experience with Senior Managers/Leadership Team
- Developed Layout led Discovery reporting and Data led Discovery reporting
- Previous development, testing, and training of new business processes

Formerly **COHERENT-AMT**
