

BBL[™]_S

Effective, Economical, and Versatile Broadband Light

 SCITON[®]

BBL™ – Broadband Light

Effective and Versatile

BBLs™ Broadband Light gives physicians the opportunity to provide a broad range of aesthetic procedures in a simple system. The most complete and versatile broadband light system in its class, BBL comes as part of Sciton's JOULE™ platform or as a standalone system.

Predictable & Consistent

Significant skin improvement can be achieved non-invasively with the BBL. Consistent and reproducible clinical results make the BBL a highly desired part of aesthetic practices.

Personalized Treatment & Visible Results

With the broadest range of wavelengths, physicians can personalize treatments to fit each patient's needs. BBL requires fewer treatments to achieve visible and superior results than other IPL systems.

Versatile & Powerful

BBL Broadband Light is the perfect choice for a broad range of treatments including permanent hair reduction, acne, dermal rejuvenation, microvasculature, and benign pigmented and vascular lesions.

Treatment Expansion – Skin Firming

SkinTyte™ can be added as a separate module with the BBL system. It employs infrared light energy to deeply heat dermal collagen leading to a renewed collagen foundation and increased skin firmness.

Fast and Cost Effective

BBLs™ delivers the fastest and most economical phototherapy treatment on the market.

Fast

With a large 15 x 45 mm spot size and a rapid repetition rate, one can treat more patients in less time with BBL.

No Consumables

BBL has unlimited pulses under warranty and no consumables, which eliminates the cost of replacement handpieces and filters.

“ Sciton BBL is my most popular choice for facial and non-facial skin rejuvenation because it’s fast, cost effective, and efficacious. It is really a win, win, win! ”

Patrick Bitter Jr., M.D.

Safe and User Friendly

The revolutionary dual flash lamp technology, Smart Filters, Finesse Adapters, and precision thermoelectric cooling make BBL safe and easy to use for physicians.

Powerful Cooling

BBL employs an integrated thermoelectric cooled sapphire crystal that keeps the treatment area consistently safe and cool with precise temperatures from 0°C – 30°C.

Interchangeable Smart Filters

Enables treatment of multiple skin conditions with various wavelengths seamlessly without interruption using rapid, on-the-fly Smart Filters.

Finesse Adapters

Allow physicians to treat hard-to-reach areas and different facial structure with magnetically attached Finesse Adapters. Available in three convenient sizes.
