Dermalinfusion's patented handpieces, in combination with vacuum pressure, lift skin into the pneumatic chamber where it comes in contact with a treatment tip that facilitates exfoliating the stratum corneum. At the same time, damaging dirt and debris are extracted from skin, while condition-specific Pro-Infusion Serums are simultaneously infused into skin. Ergonomically designed to glide across the skin, using no downward pressure, minimizing hand stress and fatigue.

**STANDARD HANDPIECE**

Uses Diamond Treatment Tips and Epiplane™ Disposable Treatment tips

**DIAMOND TREATMENT TIPS**

- Encrusted diamond tips bound to stainless steel allows safe treatment on the face including the lip and eye areas.
- Evenly abrade the skin at a controlled depth to address every skin type.
- Available in 6 levels of abrasion.

**EPIPLANE™ TREATMENT TIPS**

- Patented, disposable treatment tips with a precision-etched abrasive surface deliver precise and uniform abrasion.
- Available in 3 levels of abrasion.
- Offers the convenience of one-time use, eliminating cross-contamination and the need for cleaning.

**PORE CLARIFYING HANDPIECE**

Specifically designed to use Pore Clarifying Disposable Brush Tips

**PORE CLARIFYING DISPOSABLE BRUSH TIPS**

- Patented, disposable brush heads with precision-trimmed bristles sweep into pores, dislodging sebum and comedones.
- Available in 3 levels of abrasion.
- Offers convenience of a one-time use, eliminating cross-contamination and the need for cleaning.
