

How are ENDYMED treatments different from other RF Fractional treatment options?

Most RF fractional technologies today are based on older, traditional technologies. ENDYMED offers the most advanced fractional RF technology available today, providing clinically proven safe and effective fractional RF treatments. Combining our unique Fractional RF technology with patented 3DEEP RF volumetric heating, ENDYMED's Fractional treatments provide superior results with minimum downtime.

How many treatments will I need?

Most patients receive a series of 3 fractional treatments, once a month for 3 months.

Are the treatments safe?

ENDYMED offers the most advanced fractional RF technology available today, providing safe and effective fractional RF treatments that have been clinically proven by over 40 independent clinical studies. Our fractional treatments are designed with the most sophisticated safety features and sensors to ensure that you receive the most comfortable and effective treatment experience

Is there any downtime after treatments?

Typically, RF Fractional treatments by ENDYMED have minimal downtime. With Intensif treatments, you can absolutely return to your daily routine the day after treatment. With FSR treatments, you may have very small crusting that will disappear after 3-5 days.

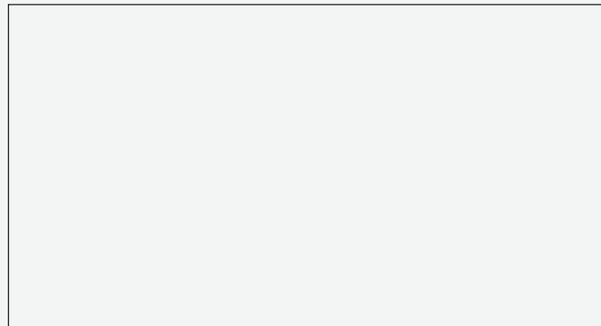

What should I expect from my ENDYMED treatments?

You should expect a comfortable and safe treatment experience. As your treatments progress, you will experience increasingly visible improvements to your skin, improvements that will continue for 3 months after the completion of your last treatment.

About EndyMed

EndyMed Medical Ltd., established in 2007, offers energy based medical aesthetic treatment systems for both the professional and consumer markets. EndyMed's unique FDA cleared 3DEEP® radiofrequency technology is a highly effective solution for nonablative and fractional wrinkle reduction, skin tightening and contouring for the face and body, acne scar treatment, skin resurfacing and RF Microneedling.

ENDYMED's innovative 3DEEP technology delivers focused RF energy 3 layers deep into the skin, without any pain or risk, reactivating the natural collagen production to reduce wrinkles and noticeably lift and tighten skin. ENDYMED treatments are suitable for all skin types.

ENDYMED - setting new standards in Fractional RF treatments

ENDYMED's Fractional RF technology provides safe, comfortable treatments that provide superior results. By combining our innovative Fractional technology with next generation 3DEEP deep dermal heating, ENDMED offers the best skin rejuvenating treatments available today, with incomparable results.

EndyMed's Fractional RF treatments offer the perfect solution for the most sought-after aesthetic treatments:

- Skin resurfacing and rejuvenation
- Deep wrinkle reduction
- Acne and traumatic scar reduction
- Stretch mark reduction
- Skin tightening
- Skin texture improvements
- Pore size reduction

Intensif RF Microneedling and Fractional Skin Resurfacing (FSR)

Intensif RF Microneedling by ENDMED

Intensif RF Microneedling, with unique smooth glide needle motion, is like no other microneedle treatment option today, offering fast and comfortable treatments without bleeding or bruising, and with minimal downtime. The Intensif provides incomparable results for deep wrinkle reduction, skin tightening and lifting, acne scar reduction, and skin texture improvements.

FSR by ENDMED

ENDYMED's FSR treatments, with unique 3DEEP Smooth Scanning technology, provides the ultimate in skin resurfacing and rejuvenation, wrinkle reduction, and textural improvements. With years of clinical proven, consistently superior results, FSR treatments offer maximum coverage with minimum downtime.

The ENDMED treatment experience offers you:

- Completely safe and comfortable treatments
- Clinically proven effective results
- Suitable for all skin types
- Minimal downtime
- Both immediate and long term superior results
- Fast treatment times
