

 EVELAB INSIGHT

# EVE MUSE

*AI-Driven Clinical Skin Analysis*

Intelligent Imaging for  
Modern Aesthetics

# EVELAB INSIGHT

## *Built for Clinical Confidence*

EveLab Insight brings clarity to aesthetic medicine through **clinically validated imaging and AI-powered analysis**—transforming subjective consultations into evidence-based decisions and actionable treatment planning.

### *Developed by ERIC*

### *Global authority in AI-driven skin analysis*

EveLab Insight Research & Innovation Center — the global authority behind Eve Muse’s AI-driven skin analysis.

**30+ regions · 340+ cities**

Deployed in **4,500+ clinics** globally

#### **Global Advisory Board**

*Prof. Jean Krutmann, MD · Prof. Sija Wang · Dr. Fudi Wang*

Powered by a **rapidly expanding clinical imaging database**

**8+ peer-reviewed publications**

# ***EVE MUSE***

*The Clinical  
Intelligence Platform  
for Aesthetic Medicine*

Eve Muse delivers objective facial and skin analysis using high-precision 3D imaging and multispectral light—capturing structural changes, skin conditions, volume distribution, asymmetry, and aging patterns in seconds to support diagnosis, treatment planning, and patient communication.

## ***Multi-Spectral Imaging for Deeper Clinical Insight***

**Five advanced light modalities**—UV, cross-polarized, parallel polarized, white, and Wood's (RGB)—capture skin data beyond the visible surface for a deeper, more complete clinical view.

## *Advanced Imaging for Objective Clinical Decisions*

- 16 skin type combinations for highly personalized analysis
- 5 high-resolution images in seconds to streamline clinic workflows
- 8 specialized light sources for multi-depth skin analysis
- 40+ surface and subsurface concerns assessed with clinical precision
- 16 MP cameras per lens for exceptional image clarity

*Powered by One of the World's  
Largest Facial & Skin Databases*

**10M+**

Images  
Annotated by  
Dermatologists'

**100k+**

Structure Profiles

# Designed to Fit Seamlessly Into Your Clinic

Eve Muse integrates **effortlessly** into existing clinical workflows.

*Fast, intuitive  
consultation flow*

*CRM-compatible with  
flexible data APIs*

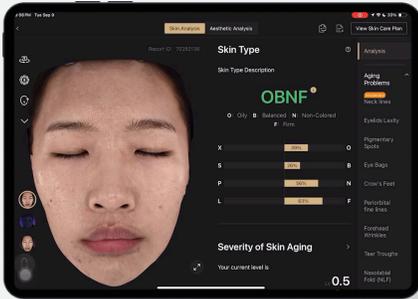

*Supports evidence-based  
treatment planning*

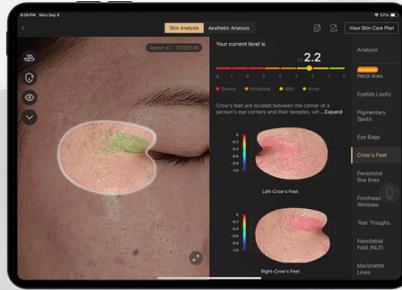

*Easily save, export, and  
send client reports*

**No disruption. No  
complexity. Just  
better consultations.**
